

The Qatar Airways Boeing 787 Dreamliner

Redefining the art of flight

By combining a masterpiece of aeronautic engineering with refined onboard hospitality, Qatar Airways proudly offers you a flight experience like no other.

Whether you are seeking a superior experience for business or leisure travel, Qatar Airways' new Boeing 787 Dreamliner is an exemplary choice. Combining breakthrough technology with a human approach to design, the Dreamliner connects you to the world's leading cities.

An unparalleled travel experience

Passenger focused service compliments a design based on travelers need.

Qatar Airways award-winning crew will make you feel at home as you sit back and relax in roomier seat. Larger electronically dimmable windows create dramatic vistas and provide natural light. Full spectrum LED lighting will set the mood and help you adjust to changing time zones.

You'll arrive to your destination feeling refreshed due to the Boeing 787 Dream liner's lower cabin pressure, improved air quality and optimal humidity.

A seat above the rest

Qatar Airways has developed superior seats for its Dreamliner fleet, integrating leading technology and timeless design.

Every seat is an aisle seat in Business class. The cabin configuration forms a unique diamond shape, allowing you to adapt your personal space to suit your needs. You can catch up on sleep in a fully reclined seat or make productive use of your time at a large work surface.

The seat also features ample stowage options, a cocktail and amenity table keeps all of your belongings in check.

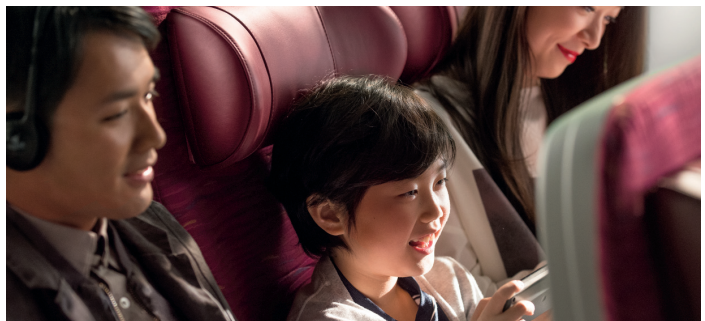

Our customers can also enjoy more space in Economy than ever before. A full 30" of personal space with a 31" seat pitch means more room for everyone to stretch out.

Innovation at its best

State-of-the art entertainment and communication devices keep you connected like never before on one of today's most technologically advanced planes.

The world's first dual-screen interface allows you to multi-task, such as playing a game on your handheld device while watching a movie on your personal screen. The innovative entertainment and communication systems feature an intuitive touch screen control unit, giving you convenient access to hundreds of entertaining possibilities. Best of all; on board Wi-Fi makes it easy to stay connected across continents with friends, colleagues and clients.

Delights to fly for

A 5-Star dining experience. Qatar Airways has an uncompromising approach to creating a sophisticated, comforting experience for the customer.

Four Celebrity Chefs and a Master of Wine have been chosen to create a unique and diverse Business class menu. Delight in extraordinary cuisine, savour exclusive vintages expertly served and an on-demand service that allows you to enjoy sweet or savory delicacies whenever you like.

All of our meals and desserts are made with a focus on the quality and freshness of ingredients. There is also a refined and varied wine selection on every flight.

The Qatar Airways Boeing 787 Dreamliner

Cleaner air

Take a deep breath. Fresh air is constantly coming in through air scoops on the side of the Dreamliner. The cabin air continuously circulates through an advanced filtration system to make the cabin air even cleaner.

Lower cabin altitude

In the Boeing 787 Dreamliner, you will feel like you are cruising at a lower altitude than on other airplanes and getting more oxygen. More oxygen, fewer headaches, less dizziness equals less travel fatigue.

Dynamic cabin lighting

The full-spectrum LED lighting brings blue skies and the feel of natural daylight into the cabin, from morning to noon to dusk to night. You will feel better adjusted and more alert when you arrive at your destination.

Larger overhead bins

Stress less over getting your luggage on board and keeping it closer at hand knowing that the Dreamliner has big overhead bins, 30% larger than the industry standard size. They close up and away—leaving more overhead space.

Environmentally cleaner and quieter

The Boeing 787 Dreamliner is the environmental leader among airplanes. It consumes 20% less fuel and produces 20% lower CO₂ emissions. The Dreamliner is much quieter for airport communities, too.

More cabin humidity

On long flights, you will find the Boeing 787 Dreamliner cabin is less dry. More moisture in the air will help your skin, your eyes, your lips, and your nose feel more comfortable.

Calmer cabin

On the Boeing 787 Dreamliner, many of the usual interior sounds are minimised. The air conditioning is quieter, interior materials reduce squeaks, and interior design reduces vibrations.

Unobstructed views

The Boeing 787 Dreamliner windows are much larger than other airplanes. This gives everyone in the cabin a view outside. With the simple touch of a button, you can gradually adjust the outside light across five settings from transparent to dark.

Spacious design

The Boeing 787 Dreamliner cabin is designed to make flying more enjoyable. The cabin is more open and the vaulted ceiling stretches the length of the cabin. The sidewalls are more vertical for better shoulder and headroom.

A smooth ride across the board

Whether in Business or Economy Class, passengers on the Boeing B787 Dreamliner benefit from the Dreamliner's dramatically improved cabin pressure, air quality and smoother handling.
